EXECUTIVE SUMMARY

Results-driven **Senior Front-End Engineer** with 5+ years of production experience architecting high-performance web applications, large-scale **eCommerce storefronts**, and transactional portals using **Next.js (App Router, Server Components, SSR/ISR)**, **React 19**, and **TypeScript**. Specialized in high-catalog scalability (handling **50,000+ SKU catalogs**, cursor-based pagination, virtualized product grids, and sub-1.2s Largest Contentful Paint), conversion-driven checkout flows, and programmatic **Technical SEO** (automated JSON-LD Schema.org product indexing, chunked dynamic sitemaps, and Core Web Vitals optimization).

TECHNICAL EXPERTISE

Frontend & Core Stack: Next.js (App Router, Server Components, SSR, On-Demand ISR), React 19, TypeScript (Strict), Tailwind CSS v4, Framer Motion, TanStack Virtual/Query.

eCommerce & Scale: 50,000+ SKU Catalog Architecture, Instant Faceted Search & Filtering, Optimistic Cart & Inventory Sync, Checkout Funnels, Paystack, Stripe, Flutterwave.

Technical SEO & Vitals: Programmatic Schema.org JSON-LD (Product, BreadcrumbList, Offer), Chunked Dynamic Sitemaps (50k+ URLs), OpenGraph, Core Web Vitals (LCP < 1.2s, CLS: 0, INP < 100ms).

APIs & Backend Data: Node.js, Express, RESTful APIs, Edge Caching with Redis, PostgreSQL, MongoDB, Firebase, Vercel Edge Runtime, Webhooks.

Engineering Standards: Clean Architecture, Modular Component Design, Responsive Accessibility (WCAG 2.1), Cross-Browser Mobile Optimization, Git/GitHub CI/CD.

CORE PROJECTS & ARCHITECTURE

Brdgr (GetBrdgr) — Modern eCommerce & Transaction Platform getbrdgr.com | brdgr.vercel.app

Next.js (App Router), TypeScript, Tailwind CSS, Node.js, Firebase, REST APIs

- Architected a modern commerce platform designed for frictionless buyer-seller onboarding, automated escrow verification, and instant checkout.
- Engineered an optimistic cart and payment flow with real-time transaction state updates, significantly reducing checkout drop-off and network latency.
- Designed an adaptive mobile-first design system with zero-layout-shift micro-interactions, leading to a 35% improvement in mobile conversion rates.

Digital Ehub — High-Velocity Multi-Category eCommerce Storefront devhubfusionx.site/gallery

Next.js, React, TypeScript, Tailwind CSS, Paystack, Stripe, Technical SEO

- Engineered an ultra-fast eCommerce storefront built for massive catalog browsing (50,000+ SKUs) with instantaneous client-side faceted filtering by category, brand, rating, and price.
- Implemented programmatic **Schema.org (Product, BreadcrumbList, Offer)** structured data across dynamic route segments, enabling automated rich snippet indexing on search engines.
- Optimized image delivery pipeline via `next/image` with WebP/AVIF formatting and layout sizing, achieving a **98+ Lighthouse Performance** score and sub-1.1s LCP.

DevhubxAPI — Unified API Gateway & Payment Aggregator devhubapi.vercel.app

Next.js, Node.js, Redis, PostgreSQL, RESTful APIs, Paystack, Flutterwave

- Built a high-throughput API gateway abstracting 40+ regional payment, identity (NIN/BVN), and mobile money providers (Paystack, Flutterwave, MTN MoMo, Airtel).

- Processed over **2.8 million API transactions per month** with 99.98% uptime across 90 consecutive days.
- Reduced average gateway latency to **4.2ms** by leveraging Redis edge caching, database connection pooling, and payload normalisation.

Dara Express — Real-Time Logistics & Order Fulfillment Portal daraexpress.com

React, TypeScript, Google Maps Platform, Cloud APIs, Automated Notifications

- Engineered a real-time order tracking and dispatch dashboard coordinating drivers, delivery milestones, and automated customer notifications.
- Integrated Google Maps Direction & Distance Matrix APIs for route calculation, reducing delivery misrouting and manual dispatch time by **40%**.

blynQe — High-Scale Modern Consumer Application blynqe.online

Next.js, React, TypeScript, Tailwind CSS, Node.js

- Led frontend architecture for an interactive platform scaled to **500,000+ users globally**.
- Leveraged Next.js Incremental Static Regeneration (ISR) and code splitting, boosting page responsiveness by 35% across lower-bandwidth mobile networks.

PROFESSIONAL EXPERIENCE

Senior Front-End & Systems Engineer — DevHubFusionX (Engineering Studio) Lagos, Nigeria (Remote) | 2021 – Present

- Architect and ship production-grade web applications, scalable eCommerce storefronts, and API integrations for clients across Nigeria, the UK, and the US.
- Implement custom technical SEO architectures for enterprise clients, driving organic traffic gains through dynamic chunked sitemaps, JSON-LD schemas, and Google Core Web Vitals optimization.
- Build high-converting checkout funnels integrating Paystack and Stripe, processing high transactional volumes with strict fraud prevention and webhook reconciliation.
- Conduct frontend performance audits, refactoring bulky legacy bundles to modern Next.js server components to cut initial JavaScript payloads by up to 50%.

Front-End Software Engineer — Contract & Consulting Remote | 2019 – 2021

- Engineered responsive Single Page Applications (SPAs) and dynamic storefronts using React, TypeScript, and modern CSS frameworks.
- Integrated RESTful backend services and GraphQL queries, establishing type-safe client-server data contracts.
- Collaborated directly with product teams to translate Figma/Adobe XD designs into pixel-perfect, accessible, production-ready code.

EDUCATION & CERTIFICATIONS

B.Sc. in Computer Science / Engineering Continuous Specialization: Advanced Next.js, TypeScript Patterns & Core Web Vitals
